CAR MULTIMEDIA NAVIGATION

COPENHAGEN 700 DAB

BLAUPUNKT MULTITASKING

The Copenhagen 700 DAB combines high-quality design down to the last detail, an intuitive operating concept and a breathtaking and innovative variety of functions. It impresses with its 6.75" TFT touch display and combines first-class RDS radio reception, a built-in DAB + tuner, a wide range of entertainment and many connection options to many types of mobile media. The Copenhagen 700 DAB has serial interfaces such as Bluetooth and USB that allow you to comfortably play your music collection. But no matter what you're looking for, the Copenhagen 700 DAB will have a good answer for you.

NAVIGATION

If your Copenhagen 700 DAB is equipped with a Navigation system your travel to unknown places will never be the same again. Discover new places with a touch of your finger and the Copenhagen 700 DAB will show you the shortest or best route to get to your destination.

APPLE CARPLAY

Use your Apple iPhone® in the car in an easy and secure way with your Copenhagen 700 DAB. With Apple CarPlay, iPhone users can navigate, make calls, play music, and retrieve messages safely and intuitively - simply through voice control or the touch-screen of your Copenhagen 700 DAB.

ANDROID AUTO

Another feature of the Copenhagen 700 DAB. Thanks the intuitive user interface, powerful voice control and built-in controls Android Auto minimize distractions while driving so you can focus on traffic..

ANALOG TUNER **CODEM**

The CODEM tuner concept used in the Copenhagen 700 DAB is a high-end reception concept developed by Blaupunkt. If the reception conditions change, it is important to keep the result constant. Blaupunkt has a special solution for this task: CODEM. Reception has been decisively improved through even better selectivity, even clearer channel separation, further freedom from distortion and other special solutions. With the high-end tuner of the CODEM generation from Blaupunkt, no compromises are made in terms of radio reception and RDS behavior. Once you have experienced it, even with the most difficult reception conditions, you will never want to be without it.

DIGITAL RADIO **dab+**

Enjoy crystal clear, digital radio with the built-in DAB + tuner. The enjoyment begins with the selection of the programs. Be it browsing through the available ensembles and their program structure, or simply choosing from an alphabetical list of all programs.

COPENHAGEN 700 DAB

MEDIA PLAYER

The constant use of digital, mobile data and media has become completely natural. Inevitably, it is an absolute duty of modern end devices to support them. But the range of supported media and formats alone makes the big difference. The Copenhagen 700 DAB does not accept any compromises. Many audio, video and image formats are supported. There are virtually no limits to the wealth of files on the respective medium. So many tracks only make sense if the selection is easy enough. Enjoy how playfully this works with the Copenhagen 700 DAB.

BLUETOOTH TELEPHONIE

Once the phone book of your smartphone has been synchronized with the Copenhagen 700 DAB, nothing stands in the way of comfortable communication while driving and via the audio system. For the best voice quality, the integrated or an external microphone is available for the perfect installation position.

BLUETOOTH AUDIO STREAMING & TRANSMISSION

Once the phone book of your smartphone has been synchronized with the Copenhagen 700 DAB, nothing stands in the way of comfortable communication while driving via the audio system. For the best voice quality, the integrated or an external microphone for the perfect installation position is available. The specialty: in A2DP mode, the Copenhagen 700 DAB can transmit the music signal wirelessly to external Bluetooth speakers or headphones.

RÜCKFAHRKAMERA

Parking can be a precision job. The Copenhagen 700 DAB has a camera input. So you always have an overview and nothing should go wrong.

SOUND TUNING

The parametric 10-band equalizer for individual sound optimization in the vehicle can be easily and precisely set via the graphic interface of the Copenhagen 700 DAB. If "playing with the frequencies" is not your thing, there is a whole range of preset sound profiles available. Depending on your personal taste, from pop, rock, electro, jazz to classical music.

EINSTELLUNGEN

A breathtaking variety of functions does not mean complicated controls. All menus are consistently simple and clearly arranged, attractively designed and, above all, easy to use.

PERMANENTER SPEICHER

Thanks to the integrated permanent memory, the Copenhagen 700 DAB saves the user settings and the preset stations if the main power supply fails.

LENKRADFERNBEDIENUNG

If your vehicle is equipped with a remote control on the steering wheel, you can use it together with the Blaupunkt Copenhagen 700 DAB via the SWC (steering wheel control). Thanks to the SWC function, the steering wheel remote control takes over the most important functions such as volume, mute or Bluetooth of the radio.
